6th International Symposium On Broomrape In Sunflower

1st Meeting On Sunflower Biotic And Abiotic Stress

June 15-18, 2026
Sheraton Hotel
Novi Sad, Serbia

SECOND ANNOUNCEMENT

Dear Colleagues and Friends,

We are pleased to invite you to participate in the **6th International Symposium on Broomrape in Sunflower & 1st Meeting on Sunflower Biotic and Abiotic Stress**, which will take place in **Novi Sad, Serbia (Sheraton Hotel)**, from **June 15-18, 2026**. The Symposium is organized by the Institute of Field and Vegetable Crops, Novi Sad (IFVCNS) and the International Sunflower Association (ISA).

Best regards,
Organizing Committee

SCOPE OF THE SYMPOSIUM

The symposium aims to present recent research advances and new strategies for managing **broomrape** (*Orobancha cumana* Wallr.), a major global challenge in sunflower production.

For the first time, the Symposium will also address both **biotic and abiotic challenges**, recognizing the growing complexity of multiple diseases, pests, drought, and soil degradation. All these factors often interact, amplifying **yield losses and complicating management strategies**.

Expanding the symposium's scope will foster a more **integrated approach** to sunflower resilience, bringing together expertise in sunflower breeding and production, pest management, disease resistance and adaptation to environmental stresses.

PRELIMINARY TOPICS

- **Broomrape and climate change.**
- **Towards biology, ecology and behaviour of broomrape.**
- **Sunflower resistance and breeding.**
- **Integrated management strategies.**
- **Socio-economic effects of broomrape occurrence.**
- **Emerging sunflower pathogens, weeds and insects.**
- **Abiotic stress in sunflower.**
- **Multi-omics approaches for sunflower resilience.**
- **Sustainable and smart sunflower cultivation.**
